By this brief notice it will be seen that the Department is in a most flourishing condition, as regards members, "machines" and all the paraphernalia necessary for fighting fire to almost any extent to which their services could be required here at present, and we hear on all hands the very best accounts as to their efficiency at fires, which have heretofore occurred. A better acquaintance with them both individually and collectively will enable us to do more ample justice to the Department on some future

The items which we publish below are from the pen of an intelligent and well educated Indian residing in this vicinity, who has kindly consented to favor us from time to time with such scraps of news or traditional reminescence as may suggest themselves. This will certainly form a very interesting feature of the Courier, and we hope to hear often from our friend "Bammenodenokaid;"

O-SAW-WAH-PON. - The aged Indian Chief, O-saw-wah-pon died last spring at Isabella. His native place is on the site of Saginaw City. His father's name was O-saw-wali-pon, his mother's name was Ke-ne-wah-nah-ah-no-quay, his original name was Kah-pay-you-quod; he being sickly, changed his name to his father's, which is the custom among the sons of the forest in their wild state. Horse Items. - One day last week a eedy looking individual with his better half in company, drove in here with a span of horses which he offered "on the most favorable terms" as dry goods men say; that is, at'a "ruinously low price for cash." The stranger was therefore detained until assistance was called when he was provided with a place in the small brick building formerly owned by Glasby as a dry-kiln. The Recorder will doubtless see if he stands in further need of the hospitalities of the city or country.—Sag. Enterprise, 2d.

The foregoing statement of Assets and Liabilities of the "Pharaxx" is presented to the careful persual and scratny of our patrons and the public generally feeling conflicted it cannot fail to impress upon the minds of all, the entire reliability, solvancy, and healthy condition the Company is in.

The "Pharaxx" was incorporated by the Legislature of Connecticut, under a "perpetual charter," with a Cash Copital of Two Hundred Thomsand Dollars. Since its organization the Company have been doing a large, and, on the whole, a presperous business, throughout the several States of the Union; and the manner in which the affairs of the Company have been managed, has inspired unusual confidence in the minus of the public towards the "Pharaxx," so that our Policies are readily sought after. Homorable deslings, liberal and catisfactory adjustments, and prompt cash payments of all fair losses, are principles in the transaction of our affairs; and we intent so to achienister our business in the future, as not only to gain, but retain, the good will, esteum, and patronage of the public.

Extra or Paramyus are as low as undoubled security and prompt indemnify to patrons will warrant. We cannot, nor is it our intention, to compete with "Wild Cat" companies, whese when is the future, is not only it get a compete without for a moment imagining that every policy a Company issues is an obligation, to which they may at any menucal be called to respond. No intolligant candid, thinking person will refuse to pay a Company is "sound to the core." We are of that denomination, as the above statement of the Company fully and clearly proves.

is the Carif. But in this effort it fails. Then the Fryen follows, in which the black leaves the central organs and rushes to the sarface, as if in another effort to expel the irritating poison through that other great excretory—the skin. In this also it fails, and the system abandass the attempt exhausted, and waits for the recovery of strength to repeat the hopeless effort another day. These are the fits or peroxysms of Fryen and Adva. Such constitutional dissector will of course undermine the health if it is not represent.

which neutralizes this malarious poison in the blood, and stimulates the liver to expel it from the body.—
As it should, so it does care this afficting disorder with perfect certainty. And it does more, or rather does what is of more service to these subject to this infection. If taken in season it expels it from the system as it is absorbed, and thus keeps those who uses it free from its attacks, keeps the system in health although exposed to the disease. Camesquently it not only cures, but protects from, the great variety of affections which are induced by this malignant influence, such as Remittent Fever, Chill Fever, Dumb, or Masked Agus, Periodical Headache, or Bilious Headache, Bilious Fevers, Neuralgis, Rheumatism, Goot, Biliadners, Toothache, Earache, Catarrh, Asthma, Palpitations, Painful Affections of the Sphen, Hysteries, Cole, Paralysis, and Painful Affections of the Stomach and Bowels, all of which, when arising from this cause, will be found to assume more or less the intermittent type. This "Agus: Crus" romoves the cause of these derangements, and cures the disease.

This it accomplishes by stimulating the exerctories to expel the virtus from the system; and those organs by degrees become habited to do this their office of their own accord. Hence arises what we term occlimatation. Time may accomplish the same end, but often life is not long enough, or is sacrificed in the attempt, while this "Anux Cura" does it at once, and with safety. We have great reason to believe this is a surer as well as safer romedy for the whole class of diseases which are caused by the missmatic infection, than any other which has been discovered; and it has still another important advantage to the public, which is, that it is cheap as well as good.
